

Rebecca Heniser's 3rd Grade Class: Cleanup Transitions

1. Music from High to Low - Choose a 2-3 minute song. Start the song loudly, and over the course of 2-3 minutes, begin to turn it down. Once the music is quiet, the kids need to be in their seats and cleaned up.
2. Cleanup Crews – Three or four students are assigned a part of the classroom to clean up. Usually we will incorporate the “music from high to low” transition with the cleanup crews.
3. Cleanup Song - The kids choose their favorite song at the moment and we play the song. They know they need to be cleaned up by the time the song ends.
4. Planet Count Down - Because we are learning about the solar system, we are incorporating the planets into our cleaning time. As a class, we name the planets together and once we get to the last planet, the students need to be cleaned up.
