Project Description

Essential Question: To what extent can photography convey a message?
Area of Interaction: Community and Service

Now that you have just finished your YES Geographic Scavenger Hunt, it is time to submit your best pictures to the magazine. This will be done in two parts, which are explained below. You will do this via the website you created. Hopefully, a few of your pictures will make the next edition or even better…the cover! The YES Geographic Magazine has a few requirements in order for you to submit your photos. Those requirements are listed below. Good luck!

TO DO LIST

PART ONE: Adding all of your favorite picture to your website
1.) Take amazing pictures during the Scavenger Hunt
2.) Import pictures into iPhoto.
3.) Create a new album in iPhoto and choose your favorite pictures from the Scavenger Hunt
   a. You must have at least 10 pictures. Of course, you can have more but at least 10!
4.) You will need to add a new page on your website called *My Albums*.
   a. You may title and change the text on this page. The purpose of this page will be to post the various pictures we capture or create. This might be something you mention in this section.
   b. This will automatically add all of the pictures to their own page.
5.) On this picture page, you will need to give each picture a caption. Most likely you will use the one from the Scavenger Hunt. You will also need to title the page and write a short explanation of what the user will see on this page.

PART TWO: The Top Three
1.) Of your favorite pictures, pick your three best pictures. Think about the **Criteria for Taking AMAZING Pictures.** How well are they demonstrated in your pictures?
2.) Create a new blog page for each picture.
3.) Describe in detail the following for each of the pictures.
   a. Give picture a creative title
   b. Explain why you like this particular picture
   c. Explain how you incorporated the **Criteria for Taking AMAZING Pictures**
   d. Point out improvements you could make to make the picture even better

PART THREE: Upload & Final Exam
1.) Once you have everything set the way you want, upload it to the server!
2.) As a class we will take a final exam which cover the **Criteria for Taking AMAZING Pictures**
