

When building an instructional video, it's essential to create slides that are clear, simple, and visually appealing.

Here are a few templates you can use:

- [Option 1: Math/Science](#)
- [Option 2: English/History](#)

We encourage you to make these templates your own!

Option I: Math / Science

[Lesson Name]

[Objective]

[Content Being Introduce]

Introduce new content: (Use formulas and visuals)

**If possible write the work out with a stylus*

Introduce Vocab:

Visual that supplements new content

**If possible annotate with a stylus*

[Example Problem #1]

[Question #1]:

Work Shown

**If possible write the work out with a stylus*

**Explain the meaning
of the solution**

[Example Problem #2]

[Question #2]: Slightly more challenging content with alternative delivery

Work Shown

**If possible write the work out with a stylus*

**Explain the meaning
of the solution**

Quick Summary Slide with Main Points

Very Visual, Short and Sweet

Option 2: English / History

[Lesson Name/Question]

(perhaps objective and
accompanying photo, graphic, etc.)

Lesson question

Hook activity

Examine a map?

Video clip?

Photo examination?

Timeline?

Brief real world example?

Political cartoon?

Key Issue:

The non-negotiable you want students to walk away with about this topic.

Work shown, accompanying graphic, photo, etc.

Key Issue: restating it here

Further explanation of Key Issue

**Accompanying graphics, photos,
etc.**

Prompt students to use their notes to answer the lesson question given at the beginning of the video
