

## Genius Project Presentation Overview

In your presentation, you will report on:

- What you did in your project. As we discussed in the kick-off, you should have pictures or short clips demonstrating the project of creating this project and how it works. You should have at least three checkpoints during the creation of your project with documentation on the process of creating your project, what you were learning, and how you were moving forward.
- What is the real world product of this genius project?
- Did you make a connection to technology topics using appropriate vocabulary and examples?
- What did you learn during this project?
- What would you like to do differently next time or recommend for someone who might tackle a project like this in the future.

Presentation should be around 3 minutes in length for an individual presenter and may be 4-7 minutes for a group of students.

Assignment #703
